

WHATSAPP LINK AND QR GUIDE

Turn your number and a first message into a wa.me link and a QR code to print or share. Built in your browser, nothing is stored.

Updated October 16, 2026 · chatinflow.com/free-tools/whatsapp-link-generator

HOW DO I MAKE A WHATSAPP LINK WITH A MESSAGE?

Put your number in international format after wa.me/ and add the message as the text parameter. The generator does it for you, checks the number, encodes the message and draws a QR code to print. It all happens in your browser and nothing is stored.

HOW A WA.ME LINK IS BUILT

https://wa.me/

The fixed start of every click-to-chat link.

Your number

Country code first, then digits only, with no plus, spaces, dashes or leading zero.

?text=

Optional first message, encoded, up to 500 characters.

NUMBER FORMATS

You type	Works?
+44 7700 900123	Yes
0044 7700 900123	Yes, the 00 is dropped
07700 900123	No, the country code is missing

BEFORE YOU PRINT THE QR CODE

- ☐ Print it at least 2 cm wide.
- ☐ Scan it with your own phone first.
- ☐ Say what happens next, like Scan to book a table.
- ☐ Put the link in your bio and your ads too.

USE THE FREE WHATSAPP LINK GENERATOR

- 1 Type your number.** Country code first. Spaces, dashes and brackets are fine.
- 2 Add a first message.** The customer sees it typed in and can change it before sending.
- 3 Copy the link or the QR code.** Put the link in your bio or your ads, and print the code at least 2 cm wide for menus and windows.

QUESTIONS PEOPLE ASK

Does a WhatsApp link expire?

It holds the link itself, not a redirect through us, so it keeps working as long as the number is on WhatsApp.

Does it work with WhatsApp Business?

The WhatsApp app, WhatsApp Business or the Business Platform: the link opens a chat with whichever number you type.

Why does my number not work?

Start with the country code instead of 0, for example +44 7700 900123.
